

Online Security Program Enhances Safety

Visa U.S.A. has an online security program called "Verified by Visa" that adds safety and reassures that only you can use your Visa card online. The voluntary service allows you to add a personal password to your existing Visa card. When you make purchases at participating online stores, you'll validate your identity by entering your password on a special Verified by Visa window.

Currently, not all Visa cards are eligible for Verified by Visa. Check www.visa.com/verified for a list of all participating issuers. You can register your card through either a participating merchant, at FFCU, or at Visa's Web site.

Once Verified by Visa is activated, your card will be recognized when you make purchases at participating online stores. A special window will pop up asking for your password, your identity will be verified, and the transaction will be completed--it's as simple as that.
